Why upgrade from Windows 7 Pro to Windows 10 Pro

The world of technology has changed dramatically since the launch of Windows 7. Windows 10 Pro is built to defend against modern security threats, seamlessly integrate with the cloud, and help you get the very most out of modern PCs and devices.

Built for modern security threats

The security landscape has evolved dramatically over the last ten years. You need the defenses to adapt with it. Windows 10 Pro integrates years of security advancements, including built-in features optimized to protect your identity, infrastructure and devices. In today's world, you need these features that weren't yet created with Windows 7:

- ✓ Windows Hello*
- ✓ Secure Boot
- ✓ Windows Information Protection**

Cloud-ready management

Ten years ago, your IT team might have managed a server in the data closet. No longer. Windows 10 Pro is built to fully exploit the modern, cloud-based world. Now you can have files, settings, and Microsoft Store apps sync and update across all your devices.

- ✓ Azure Active Directory[†] join
- ✓ Mobile Device Management client
- ✓ Windows AutoPilot
- ✓ Windows Update for Business
- ✓ Microsoft Store for Business[‡]

Tools for the modern workplace

In today's world, mobility and flexibility are more important than ever before. Which is why Windows 10 lets you work how you want, where you want, without compromise. Work offline and sync automatically when you're back online. And choose from multiple ways to get things done, including voice, touch, pen and, yes, even keyboard.^{***}

- ✓ Windows Ink^{***}
- ✓ Tablet Mode
- ✓ OneDrive syncing
- ✓ Cortana^{*****} at work

Why go Pro?

Windows 10 Pro was designed to meet the needs of business, with robust features that don't come with the consumer edition. Only here will you find unique features that enable your team to function at a higher level and work more collaboratively, more productively, and more securely. Use the same Windows that Fortune 50 enterprises rely on everyday.

Enterprise-Grade Security

Windows 10 Pro brings corporate-level security to companies of all sizes. Microsoft's comprehensive approach, from data encryption to protection from unauthorized access, helps secure your organization against the most dangerous modern security threats.

- ✓ BitLocker + BitLocker to Go
- ✓ Windows Hello* with Azure AD† integration
- ✓ Windows Information Protection

Powerful Management Tools

Windows 10 Pro integrates into your existing infrastructure. Features to create and enforce network, user, group, and device policies that align with your business needs. Simple, single sign-on to your business network, giving you easier access to shared data and devices.

- ✓ Azure Active Directory† join
- ✓ Domain join + Group Policy
- ✓ Windows AutoPilot
- ✓ Deferred Updates via Windows Update for Business
- ✓ Microsoft Store for Business†

Enhanced Productivity

Remote Desktop let your whole team - including, crucially, your IT department - access desktops from virtually anywhere. So not only can you access your desktop from virtually anywhere, but IT can make fixes and changes in real time, no matter where the machine might be.

- ✓ Remote Desktop
- ✓ Cortana** at work with Azure AD† integration
