

## Remote Management Card RMCARD205

Remotely manage, monitor and control your UPS from a web browser or SNMP management application.

The CyberPower RMCARD205 is a full-featured network UPS management device that remotely manages, monitors, and controls CyberPower UPS systems and ATS PDU products.

The internal card allows remote monitoring and control of a UPS via Web Browser or NMS connection. By utilizing the auto-shutdown software, servers and workstations stay protected from data loss due to power failure. An optional Environmental Sensor (ENVIROSENSOR) can be added to monitor ambient temperature and humidity. Event logging tracks UPS or ATS PDU events and input/output status records. Automated event notifications via email, SMS text, SNMP Traps, and Syslog server can be setup to insure real time status of changes.

The firmware can be updated by users to insure you have the latest features and updates. MD5 security management is also provided to protect the integrity of the network.

A Three-Year Warranty ensures that this network management card has passed our highest quality standards in design, assembly, material or workmanship.

### Features

- Real time UPS monitoring
- Remote management and configuration of UPS and ATS PDUs (HTTP/HTTPS) via Web Browser or NMS (SNMPv1/v3)
- Automatic events notification via Email, SMS, SNMP Traps, and Syslog
- IEEE 802.3 auto-negotiation of speed/duplex mode for 10/100 Mbps
- User upgradeable firmware
- Event & Data Logging
- Supports TCP/IP, UDP, FTP, DHCP, DNS, SSH, Telnet, HTTP/HTTPS, SNMPv1/v3, IPv4/v6, NTP, SMTP and Syslog protocols
- Supports RADIUS, LDAP, LDAPS and Windows Active Directory external authentication protocols
- MD5 security management
- Compatible with select Smart App Sinewave and Smart App LCD models\*
