

Whiteboard Projection Screen

WhiteBoardScreen™ Universal Series

User's Guide

Thank you for choosing the WhiteBoardScreen™ Universal Series dry-erase whiteboard projection screen! Please read through this user guide before utilizing the screen. Correct usage and maintenance will ensure a long product life.

Precautionary Notes:

Before using the dry-erase function of your whiteboard screen, please make note of the following instructions to properly maintain and clean your dry-erase surface projection screen. (These Whiteboard cleaning tips are just as relevant with any dry-erase writing surface as they are with our Whiteboard-Projection Screens.)

1. Only use a high density foam eraser when removing dry-erase markings from the Whiteboard screen.
2. Do not use abrasive erasers as these may scratch the surface of the screen.
3. Never spray the whiteboard cleaner solution onto the surface while marker writing is present and then attempt to use a high density foam eraser to remove. This will only smear the dry-erase marker ink making the surface more difficult to clean and will likely ruin the foam eraser.
4. If there are any dry-erase markings left behind even after attempting to remove them using our high density erasers, spray our whiteboard cleaning solution directly onto the screen surface and use only a soft microfiber cloth to wipe-down and clean the area.

1. Mark the location the WhiteBoardScreen Universal will be installed and drill your holes for all of the Top Hanging Brackets (d). Once the holes have been drilled, insert and screw the wall screws (a) as shown below. It is strongly recommended to install the WhiteBoardScreen Universal on wood studs for added stability. If the location does not have wood studs, then use the included hollow wall (drywall) anchors (c).

2. Next, attach the **tray** (i) to the bottom of the WhiteBoardScreen Universal with the three **M5 screws** (h) as shown below.

3. Hang the WhiteBoardScreen™ Universal on the **Top Hanging Brackets** (d), making sure the top lip inserts into the rail on back of the frame.

4. Next, attach the **Bottom Hanging Brackets** (b) to the bottom frame, again making sure the lip of the bracket inserts in the rail.

4. Drill and insert the **hollow wall anchors** (c) into the drilled holes, and then screw the bottom hanging bracket to wall.
