8-Port Rack-Mount PDU with C13 Outlets - 1U - 16 A
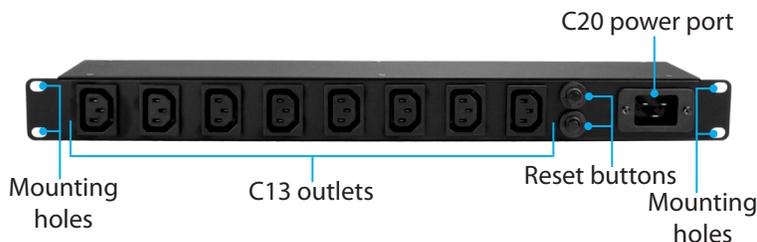

PDU08C13AU

Introduction

The PDU08C13AU is a cost-effective power distribution solution that you can mount in your rack to deliver power to your rack-mounted equipment. The PDU is constructed from durable steel and mounts horizontally in your rack, taking up only 1U of space. The PDU features a dual circuit breaker that is designed to protect your equipment from power surges, and two reset buttons that you can use to reset the PDU after a power surge.

Package contents

- 1 x rack-mount PDU
- 1 x 10 ft. (3 m) C19 to AS3112 power cord
- 4 x screws
- 4 x cage nuts
- 1 x instruction manual

Requirements

- Power source
- 1U of space in a server rack

Requirements are subject to change. For the latest requirements, please visit www.StarTech.com/PDU08C13AU.

Install the rack-mount PDU

The rack-mount PDU takes up 1U of space.

1. Line up the **Mounting holes** on the rack-mount PDU with the mounting holes on your server rack.
2. Use the provided screws and cage nuts or the mounting hardware that came with your rack to attach the rack-mount PDU to your server rack.
3. Connect the power cord to the **C20 power port** on the rack-mount PDU and a power source. Make sure that you connect the power cord directly to the power source and not another PDU.
4. Connect the devices in your server rack to the **C13 outlets** on the rack-mount PDU.

Caution! The combined power draw of all of the devices attached to the rack-mount PDU shouldn't exceed 16 A, otherwise you will trip the built-in circuit breaker.

Troubleshooting

What do I do if I trip the circuit breaker?

If you trip the circuit breaker, complete the following:

1. Make sure that the combined power draw of all of the devices attached to the rack-mount PDU doesn't exceed 16 A.
2. Press one of the **Reset buttons** on the rack-mount PDU.

Specifications

Input	C20
Output	C13 (x8)
Voltage	100 to 240 V ac
Maximum current	16 A
Number of fuses	2
